Tools & Platforms: Figma, Hotjar, OneTrust, Adobe Suite, Google Tag Manager

PROFESSIONAL EXPERIENCE

PERRIGO COMPANY, Charlottesville, VA

2005 to 2026

Senior Web Developer

Led web development and digital experience initiatives across 15+ consumer health brands, serving as the primary technical partner for marketing teams. Owned front-end architecture, CMS platforms, SEO implementation, analytics, and website performance, delivering scalable solutions that supported business growth and regulatory compliance.

Ownership & Scale

- Owned end-to-end website operations for 15+ consumer health brands, serving as the primary technical resource for marketing campaigns, site updates, technical fixes, and compliance-sensitive releases. Ensured consistent, on-time delivery without reliance on additional development resources.
- Developed and managed Shopify-based DTC e-commerce and subscription platforms across multiple brands, supporting conversion optimization, customer retention, and revenue growth initiatives.

- Engineered custom CMS modules for Shopify, HubSpot, and an in-house .NET CMS, creating self-service tools that enabled marketing teams to make updates without developer support.

Growth, SEO & Performance

- Led technical SEO implementation, including audits, on-site fixes, schema, site-speed improvements, and redirect strategy. Partnered with agencies on research and content strategy while independently owning technical execution, driving a 62% increase in organic clicks and 107% growth in organic sales.
- Designed and implemented A/B tests for audience-specific landing pages, evaluating messaging, layouts, and offers to improve conversion performance.
- Developed personalized website experiences for authenticated users, dynamically adapting content and features based on customer behavior, account status, and profile data.
- Supported conversion rate optimization initiatives through UX improvements, friction reduction, and iterative testing.

Regulatory & Risk Management

- Delivered an emergency redevelopment of a non-compliant website, completing a fully responsive, FDA-compliant rebuild within one week and eliminating regulatory risk.
- Architected and deployed an internal ASP.NET/SQL CMS to manage legal claims and regulatory label approvals, replacing manual processes and improving cross-department visibility.
- Implemented GDPR-compliant privacy tracking and cookie management across all digital properties by integrating OneTrust, Shopify's privacy framework, and Google Tag Manager.

Reporting & Marketing Enablement

- Created and deployed email campaigns in Klaviyo and Salesforce Marketing Cloud, building automated workflows and enrollment forms that grew the subscriber list by 10K+ and supported advertising, newsletter, and promotional campaigns.
- Built automated Looker Studio dashboards that transformed complex analytics into clear monthly reporting for marketing stakeholders.

Previous Roles: Web Developer and .NET Developer
