

Kurt Siefken

Web Developer & Marketing Technology Specialist with 20+ years of experience

kurt.siefken@gmail.com • (540) 383-7263 • [linkedin.com/in/kurtsiefken](https://www.linkedin.com/in/kurtsiefken) • Charlottesville, VA

Web developer and digital experience leader focused on bridging the gap between marketing and engineering. I work closely with marketing teams to turn strategy into fast, reliable, and measurable web experiences, covering everything from development and CMS architecture to SEO, CRO, and analytics. Known for delivering solutions that both perform technically and drive business results.

TECHNICAL SKILLS

Languages & Front-End: HTML, CSS, JavaScript, React, Shopify Liquid, SQL

Web & CMS: Shopify, Hubspot, WordPress, Drupal, custom (asp.NET / VB)

Analytics, SEO, & GEO: Google Analytics (GA4) certified, Google Search Console, Looker Studio

Marketing & Automation: Klaviyo, Salesforce Marketing Cloud, Shopify Email

Experimentation & CRO: A/B testing, personalization, conversion rate optimization (CRO)

Tools & Platforms: Figma, Hotjar, OneTrust, Adobe Suite, Google Tag Manager

EXPERIENCE

Perrigo Company - *Lead Web Developer*

OCTOBER 2005 - MARCH 2026

Ownership & Scale

- End-to-end technical owner for 15+ consumer health product websites across highly regulated industries, executing priority updates and campaign launches.
- Built and managed Shopify-based DTC ecommerce and subscription membership platforms, supporting revenue growth and customer engagement initiatives.
- Built custom CMS modules for Shopify and HubSpot and engineered an in-house .NET CMS with user-friendly tools to empower marketing teams to make their own updates.

Growth, SEO & Performance

- Led technical implementation of SEO initiatives with zero server-side errors, increasing organic search clicks by 62% and organic sales by 107% in 2025.
- Configured and executed A/B testing of audience-specific landing pages, optimizing messaging, layout, and offers to improve conversion rates.
- Implemented personalized experiences for authenticated users, dynamically adapting content and features based on behavior, status, or profile data.
- Drove continuous conversion rate optimization (CRO) through iterative UX improvements, friction reduction, and copy refinement to streamline the purchase funnel.

Regulatory & Risk Management

- Led emergency redevelopment of noncompliant website, delivering a fully responsive, FDA-compliant rebuild within one week and eliminating regulatory risk.
- Architected and deployed internal CMS built with ASP.NET/SQL to manage legal claims and track regulatory label approvals, improving cross-department visibility and replacing manual workflows.
- Collaborated with legal and marketing teams to implement GDPR-compliant privacy tracking and cookie management.

Reporting & Marketing Enablement

- Built and deployed email campaigns using Klaviyo and Salesforce Marketing Cloud, including workflows and enrollment forms.
- Built automated Looker Studio reporting systems, transforming complex analytics into customized monthly dashboards for marketing stakeholders.

Previous experience as a **Localization Engineer** for multiple software companies.

EDUCATION

Florida State University - *B.S. Statistics*

SEPTEMBER 1994 - AUGUST 1997

PROJECTS

Opill.com - *National Product Launch*

Launched marketing and DTC website for Opill, the first FDA-approved over-the-counter birth control pill in the U.S. Built CRO program capturing 10,000+ leads via Klaviyo and Salesforce Marketing Cloud. Implemented analytics, tracking, and SEO framework to support national media exposure, including A/B testing and personalization.

Walmart Baby Formula Microsite - *Strategic Retail Partnership*

Launched retail-focused microsite supporting Walmart baby formula initiative. Developed responsive front-end and integrated analytics to drive and measure direct traffic. Collaborated with Walmart stakeholders in Bentonville to align on brand and compliance.

Internal Claims Management System - *Regulatory Workflow*

Designed and deployed ASP.NET/SQL application to manage regulatory label claims routing and approvals. Replaced manual email/spreadsheet process with centralized workflow; adopted by graphics, regulatory, and legal teams and still in use seven years later.

FDA Compliant Web Site Rebuild - *Regulatory Response*

Rebuilt noncompliant marketing site from Figma to fully responsive HTML/CSS within one week under regulatory deadline. Eliminated compliance risk and replaced overseas vendor implementation through direct coordination with regulatory stakeholders.
